Team Name: Team Playlist

Release Name: Musaic

Release Date: March 16th, 2018

Revision Number: 1

Revision Date: March 15th, 2018

Alec McLeod (Project Owner)

Jonathan Ortiz (SCRUM Leader)

Michelle Ly

Merrick Swaffar

Sasha Shahdoost-Rad

Cole Boyer

High-Level Goals:

- Have a website in which users can search through Spotify's catalog of music
- Create playlists which can be streamed within our website
- Be able to share these playlists with other users
- Be able to reorder, shuffle, and delete tracks from a playlist
- Allow groups of people to collaborate on individual playlists

Completed User Stories:

Sprint 1

1. As a student I want to take time to acquaint myself with the technologies so that I can be an effective and productive team member. **5 points**
2. As a user I want to be able to login to spotify through this website to use their functionality. **2 points**
3. As a user I want to be able to search the Spotify archive to choose music to add to the playlist. **8 points**

Sprint 2

1. As a user I would like the design and styling of the site to be clean and simple to make the site understandable and easy to use. **13 points**
2. As a playlist owner I want to be able to invite friends to my playlist so that we can share music. **5 points**

Sprint 3

1. As a user, I would like to be able to listen to the songs in my playlist so I can enjoy music. **8 points**

Sprint 4

1. As a playlist owner I want my playlist to appear on my spotify account when I create it. **8 points**
2. As a user I want to see my playlist update dynamically when other users collaborate on it. **5 points**
3. As a playlist owner I want to be able to reorder, shuffle and delete songs to control the playlist. **8 points**

Backlog:

1. As a listener I want to be able to vote to reorder or delete songs to control the playlist.
2. As a host I want to be able to make my playlist public or private, to share with only friends, or with the world at large.
3. As a user I want to be able to browse and discover online collaborative playlists to discover and listen to new music.
4. As a playlist owner I want to be able to limit my playlist to certain genres or artists to keep my playlist better curated.
5. As a user I want to be able to add song files from my phone or computer so I can have a more diverse pool of songs to choose from. (mp3?)
6. As a user I want to be able to communicate via chat so I can socialise with other users.
7. As a user I want to be able to share my collaborative playlist with others via social media to engage with a larger group of friends.

List of Known Bugs and Restrictions:

Known Bugs and Restrictions	Reason Why	Possible Fix
Rarely refresh won't catch update	Updating the database is an asynchronous operation	N/A
